WEB DESIGN	Adobe Photoshop, Adobe Illustrator, Sketch, Figma

EXPERIENCE

Edify
JavaScript Developer   February 2019 - Present

Creating functional programs and applications to break down data silos into a single global platform for call centers to help build better relations between agents and customers to improve the customer service experience for all.

- Translate Figma designs and wireframes into reusable components and develop user interfaces for 25+ pages and interfaces across 5 products in the software suite.
- Convert static HTML/CSS/JavaScript/PHP pages into React Components.
- Conduct browser-based debugging and performance testing across multiple web-capable devices and browsers.
- Collaborate with backend developers to integrate RESTful and socket API data into the user interface.
- Perform code reviews for 6 development teammates to ensure components & interfaces are optimized for maximum performance and usability with TypeScript in conjunction with ESlint.
- Serve as a knowledge base for 11+ teammates between 5 different repos.

TrendyMinds
Developer (Jr. Developer 2014 - 2017)   May 2014 - November 2018

Developed alongside a team of 6+ across the country to build and maintain enterprise-level websites and applications for clients in a wide range of industries.

- Enabled CSS preprocessors SASS and Stylus with BEM methodology, to create more structured and understandable stylesheets for easier collaboration with the development team.
- Collaborated directly with the 3+ UX/UI designers to quickly dissolve any issues that might affect the outcome of client and user expectations.
- Automated development using build tools Gulp and Grunt to optimize testing and deploy linted code.
- Spearheaded the creation of accessibility process documentation for implementation of WCAG 2.0 AA guidelines on client's sites which generated quarterly reports and revenue.
- Conducted rigorous browser testing across 6+ browsers (including mobile) with BrowserStack and iOS Simulator to confirm user experience was synonymous.

USA Track & Field
Front-End Developer   October 2013 - May 2014

Worked with a small team of developers to maintain the national organization's website as well as the network of associations across the country.

- Created and conducted CMS(ExpressionEngine) training for 50+ administrators in the USATF association network.
- Problem-solved remotely with onsite teams across the country to update event results and information for the national organization site.
- Took sole creative responsibility to develop 100% responsive UX for websites for on-site events.
